

Machigi is clothing you can comfortably wear anywhere, whether in the office or just in the neighborhood,

Our new concept is making shirts with individuality that incorporate Japanese dyeing techniques. Colors come out differently in every shirt, so every shirt is one of a kind. You're sure to find the shirt that matches you.

These steam-dyed shirts are slightly crisp and Japanese Quality. Thanks to their lightweight yukata (an informal cotton kimono (for summer wear))-like fabric, they are breathable, moisture-absorbent, and gentle to the skin. These shirts feature ombre dyeing specific to “steam printing,” which is a traditional Japanese dyeing technique.

A laid-back vibe brought out by TOKYOMACHIGI

A button-down Oxford shirt and a suit are staple office wear. The goal of that clothing is to mask individuality and signal one’s loyalty to the company. But the work clothes and streetwear of working people are all too drab. We are always wondering if something more charming or scintillating wouldn’t be better. Why not enjoy apparel that blends in well both at work or in town? Wouldn’t that allow people to work and lead more fulfilling lives?

This concept led to the development of Tokyomachigi. The fabric is lightweight and comfortable to the skin. A cotton-hemp blend, this carefully chosen fabric has exceptional breathability and water absorbance. The designs are decidedly casual in nature with an urbane look that blends in well on the street. The shirts are ombre dyed in various colors and showcase the features of Tokyo steam-printing. Tokyomachigi will continue to evolve. Why not join Tokyomachigi and look for wide open vistas as you head out or to the office?
